About the NESS security products:

Ness Security Products, manufacturers and wholesalers of award winning Australian designed electronic security equipment recently celebrated its 40th year of local security products design and manufacturing and its 14th year of contract manufacturing.

Quality is at the forefront of Ness business and the company has been accredited to the International ISO9001/2000 Quality Standard since 1992. Ness has also achieved intrinsically safe product certification to MP87 standard and recognition locally with multiple Australian Designer awards for excellence in design and innovation.

Ness' latest achievement, certification by Test Safe Australia for the manufacturing of intrinsically safe products has added to over 18 years of ISO 9001 accreditation. This is an enviable record that very few competitors if any can boast. Clients currently benefiting from Ness' expertise range from diverse fields including automotive, mining, telecommunications and medical industries.

So if you have been searching for a quality manufacturer for any of your electronic requirements then look no further. Ness provides a 100% guarantee.
